ARX Tandem Rollers 1.5 - 4.5 t

www.ammann-group.com

ARX 12 - 45 Vibrating Rollers

Compaction Power pure

3 Platforms - 8 Models - 13 Versions

The lightest platform from 1.4 to 1.6 tonnes operating weight and working widths from 82 to 100 cm offers 3 models for small job sites of asphalt or gravel layer compaction.

Specific focus for the most common size of small tandem rollers was assured having a separate platform for the ARX23 and ARX26 (weight class 2.3 - 2.6t, working widths 100 and 120 cm). This results in the best Quality - Performance - Cost ratio on the market.

Type	CECE-weight	Drum width	Compaction
	kgs	mm	kN
ARX12	1475	820	23
ARX16	1520	900	23
ARX16 K	1460	900	23
ARX20	1570	1000	24
ARX23	2250	1000	41
ARX23 K	2045	1000	41
ARX26	2460	1200	47
ARX26 K	2250	1200	47
ARX36	3725	1300	50
ARX40	4125	1300	52
ARX40 K	4055	1300	52
ARX45	4650	1380	55
ARX45 K	4325	1380	55

ARX 12 / 16 / 20 „side-free version“ & ARX 23 / 26 / 36 / 40 / 45

One Concept - 13 models

Best compaction performance

By combining the ARX36, 40 and 45 in the heaviest platform Ammann is able to generate outstanding compaction output for medium asphalt jobs and base courses of gravel, sand and mixed soils.

The large drum diameter of these models offers the best compaction factor in the market.

ARX1 - Complete side-free

ARX2-4 - drum offset

Combination Version

Tandem Version

The ARX-range with 8 models of double-drum roller in the weight categories 1.5 – 4.5 tonnes and working widths from 820 – 1380 are designed for asphalt- and soil compaction.

All models have an optimum design with regard to use and economic efficiency based on three product categories. A new hydraulic concept coupled with the latest Yanmar diesel engine technology enable us to gain a significant increase in efficiency. It allows the diesel engine to run at a much lower speed, effectively reducing consumption and noise emissions.

A generously designed operator station with vibration insulation, a simple and clearly laid out operating panel and the multi-functional drive lever next to a comfort-seat form a unit that any driver will welcome for ergonomic reasons and more.

Combination Version

The ARX-rollers are also available as combination rollers ARX16 K, 23K, 26K, 40K and 45K.

The combination model has an in-built anti-adhesive tank with direct pressurised sprinkler system to the tyres. The control of the anti-adhesive sprinklers is operated by a separate hand switch. The standard interval-sprinkler switch allows optimum water-supply on every asphalt-job.

Side-free Model

The ARX12 - 20 tandem vibrating rollers are supplied as full flush models with double drive and double vibration as standard. This feature enables the drum to compact completely up against a wall. There is no more additional tuning work needed with additional compaction equipment.

40 mm off-set of drums

ARX Vibrating Rollers - One Concept

Features & benefits

The operator makes the difference

During the development of the ARX series the needs of the operator were at the centre of the platform design. Our standard ergonomic criterias to design a safe, comfortable and productive working environment are:

- Double vibration isolated operator platform
- Fully adjustable and lateral sliding seat
- „Best - View - Design“ to drum edges and surfaces by narrow frame structure
- Clear, simple and robust layout of all displays, switches and clashboard

Best view to drum

Technic - Safety - Comfort

Features & benefits

Vibration & Sprinkler System

- Strong vibration system with 2 frequencies
- Large drum diameter for excellent asphalt compaction
- Large water tank for minimum of 1 days usage
- Water-sprinkler-system with pressurized pump; interval timer and 3 stage filtration
- AVC - Ammann Vibration Control
- 2 vibration amplitudes for ARX36, 40, 45

Driver comfort and safety

- Highest levels of driver comfort due to:
 - Rubber-mounted driver's platform isolated from chassis
 - Adjustable seat
 - Slideable seat (ARX23-45)
- Emergency - switch standard

Transport

- Folding ROPS for best transportation
- 4 Large towing-hooks front rear
- Central lifting-point on ARX12-26

Emission & Consumption

- Latest Yanmar diesel engine technology for the lowest fuel consumption and emission level
- Biodegradable oil is an option

Service

- Due to the large opening engine hood optimum access from one side for daily service checks.
- Maintenance-free articulation-joint
= no greasing for lifetime of the machine
- Simple and reliable electrical circuits with relays instead of printed circuit boards

Easy operation and safe transport

Clear dashboard layout

4 large tie down points for safe fixing onto trailer / truck

Best service access due to large engine hood

Central lifting point on ARX1(standard) ARX2 (option)

Powerful

Optimum compaction results thanks to:

- High-torque, water-cooled Yanmar diesel engine
- 2 working speeds
- 2 frequencies with 2 centrifugal forces
- Single or double vibration with double traction
- Large drum diameter
- Balanced weight front and rear
- Large corrosion free water tank
- Multiple water filtration
- 2 scrapers per drum

Easy to operate

High comfort of operation due to:

- Easy-to-operate instrument panel
- Tight turning radius
- Compact dimensions for transport
- Smooth starting and reversing of the machine by electric drive-lever
- Rubber mounted operator's platform

Easy to maintain

Minimum maintenance required:

- Bearings are lubricated for life time
- Teflon-coated central articulation-joint; lubricated for lifetime
- Engine hood can be completely opened
- Direct access to the maintenance points situated at one side
- Outside drain plugs for rapid change of machine fluids
- Water filters and nozzles are easily accessible

Safe

High safety standards:

- CE-Package: Folding ROPS, emergency stop, comfort seat with security belt and seat contact switch
- Ergonomic instrument panel
- Unobstructed view to the drums

Vandal protection of the machine with lock preparation on:

- instrument panel
- engine hood
- fuel tank
- water tanks

Suitable

The ARX-Serie rollers are based on a modular concept allowing:

- the customisation of the machine to specific applications of the user
- optimisation of spare parts management due to wide compatibility of the parts between different ARX models

Lockable diesel-tank standard

Folding ROPS for easy transport

2 drive-lever

Edge-cutter

Standard

- Front and rear vibration and drive
- Control system with emergency stop
- Pressurised plus intervall sprinkler system
- Ammann Vibration Control
- Lateral sliding seat on ARX23 - 45
- Central lifting hook (option on ARX 2)
- 2 working frequencies
- Hydraulic test-port

Options

- CE-Kit with folding ROPS and working lights
- Road lighting
- Canopy
- Asphalt-thermometer (only on ARX4)
- Reverse alarm
- Battery disconnection switch
- Central lifting hook (only on ARX 2)
- Wide-tyre-kit ARX 26 combi
- ATC - Ammann Traction Control (only on ARX 2 + 4)
- Arm rests
- second drive-lever, left
- Edge-cutter incl. multi-function lever
- Bio-degradable hydraulic oil
- Drums in Line (only on ARX 1)
- Customer Colour
